TINTINAGOLD RESOURCES INC.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE NINE MONTHS ENDED JUNE 30, 2010**

(Unaudited - Expressed in Canadian Dollars)

1. NATURE OF CONTINUANCE OF OPERATIONS

TintinaGold Resources Inc. ("TintinaGold" or the "Company") was incorporated on July 30, 1998 under the laws of British Columbia as Global Sortweb.com Inc. ("Global"). On June 9, 2006, the Company changed its name from Global to Mantra Mining Inc. ("Mantra") Prior to the name change, the Company was involved in developing internet services through its wholly-owned subsidiary. The Company changed its name on September 28, 2009 from Mantra to TintinaGold Resources Inc. by a resolution of the directors to better reflect the Company's focus on the Tintina gold belt in Alaska, United States.

On December 15, 2006, the Company acquired a 100% wholly owned subsidiary company, Mantra Mining (India) Pvt. Ltd., located in Pune, India. On June 30, 2008 and August 14, 2008, the Company incorporated two separate companies in the state of Delaware, Mantra Alaska Mining, Inc. ("MAMI") and Mantra Alaska Exploration, Inc. ("MAEI") respectively in anticipation of acquiring interest in mineral claims in Alaska. On June 21, 2010, the Company changed the names of MAMI and MAEI to Tintina Alaska Mining, Inc. and Tintina Alaska Exploration, Inc. respectively. The results of operations of the incorporated subsidiaries have been included in these consolidated financial statements from the acquisition date.

On September 30, 2009 the Company's shareholders approved a plan of arrangement ("Arrangement") in which the Company transferred its interest in the Gnome Zinc Project and \$500,000 in cash to AsiaBaseMetals, Inc. ("AsiaBaseMetals"), a wholly-owned subsidiary incorporated for the purpose of the Arrangement. At the effective date of the Arrangement, the Company will distribute to the shareholders of the Company all of the AsiaBaseMetals shares that it received pursuant to the Arrangement. The British Columbia Supreme Court granted final approval for the Arrangement on September 29, 2009. On October 8, 2009, the Company distributed to the shareholders all of the AsiaBaseMetals shares pursuant to the Arrangement.

The Company is in the process of exploring its resource properties and has not yet determined whether these properties contain ore reserves that are economically recoverable. The recoverability of amounts shown for resource properties and related deferred exploration costs is dependent upon the discovery of economically recoverable reserves, confirmation of the Company's interest in the underlying mineral claims, the ability of the Company to obtain necessary financing to complete the development and upon future profitable production or proceeds from the disposition thereof.

For the nine month period ended June 30, 2010, the Company incurred a loss of \$1,783,008 (2009: \$1,524,238), and had an accumulated deficit of \$14,022,184 (2009: \$7,032,304) which has been funded primarily by the issuance of equity. The Company's ability to continue its operations and to realize assets at their carrying values is dependent upon obtaining additional financing and generating revenues sufficient to cover its operating costs.

These consolidated financial statements do not give effect to any adjustments which would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in these consolidated financial statements.

2. SIGNIFICANT ACCOUNTING POLICIES**a) Presentation and Consolidation**

These consolidated financial statements have been reported in Canadian dollars and are prepared in accordance with Canadian generally accepted accounting principles. The financial statements include the assets, liabilities, results of operations and cash flows of the Company and its wholly-owned subsidiaries, Mantra Mining (India) Pvt. Ltd.; Tintina Alaska Mining, Inc.; and Tintina Alaska Exploration, Inc. All significant inter-company balances and transactions have been eliminated.

TINTINAGOLD RESOURCES INC.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE NINE MONTHS ENDED JUNE 30, 2010**

(Unaudited - Expressed in Canadian Dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)**b) Cash and cash equivalents**

The Company considers all highly liquid instruments with a maturity of three months or less at the time of issuance to be cash equivalents.

c) Resource properties

All costs related to the acquisition, exploration and development of resource properties are capitalized. Upon commencement of commercial production, the related accumulated costs are amortized to income using the unit of production method over estimated recoverable ore reserves. Management periodically assesses carrying values of non-producing properties and if management determines that the carrying values cannot be recovered or the carrying values are related to properties that have lapsed, the unrecoverable amounts are expensed.

The recoverability of the carried amounts of resource properties is dependent on the existence of economically recoverable ore reserves and the ability to obtain the necessary financing to complete the development of such ore reserves and the success of future operations. The Company has not yet determined whether any of its resource properties contains economically recoverable reserves. Amounts capitalized as resource properties represent costs incurred to date, less write-downs and recoveries, and does not necessarily reflect present or future values.

When options are granted on resource properties or properties are sold, proceeds are credited to the cost of the property. If no future capital expenditure is required and proceeds exceed costs, the excess proceeds are reported as a gain.

d) Long-lived assets

The Company monitors the recoverability of long-lived assets, based on factors such as current market value, future asset utilization, business climate and future undiscounted cash flows expected to result from the use of the related assets. The Company's policy is to record an impairment loss in the period when it is determined that the carrying amount of the assets may not be recoverable. The impairment loss is calculated as the amount by which the carrying amount of the assets exceeds the fair value of the asset.

e) Equipment

Equipment is stated at cost less accumulated amortization. Amortization is recorded over the estimated useful lives of the assets on the declining balance basis at the following annual rates:

Office equipment	14%
Office furniture and fixtures	18%
Computer equipment	40%
Computer software	40%

f) Asset retirement obligations

The Company follows the recommendations of the Canadian Institute of Chartered Accountants ("CICA"), Handbook Section 3110 "Asset Retirement Obligations", which requires the estimated fair value of a liability for an asset retirement obligation be recognized when it can be reasonably estimated. This includes obligations related to future removal of property and equipment, and site restoration costs. The asset retirement obligation is recorded as a liability with a corresponding increase to the carrying amount of the related long-lived asset. As at June 30, 2010, the Company has not recognized any asset retirement obligations in respect of its resource properties.

TINTINAGOLD RESOURCES INC.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE NINE MONTHS ENDED JUNE 30, 2010**

(Unaudited - Expressed in Canadian Dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)**g) Stock-based compensation**

The Company has a stock option plan, which is described in Note 8. Stock options are recorded at their fair value over their vesting period as compensation expense, and agents' warrants issued in connection with common share placements are recorded at their fair value on the date of issue as share issuance costs. On the exercise of stock options and agents' warrants, share capital is credited for consideration received and for fair value amounts previously credited to contributed surplus. The Company uses the Black-Scholes option pricing model to estimate the fair value of stock-based compensation.

h) Foreign currency translation

Transactions and balances in currencies other than the Canadian dollar are translated using the temporal method. Accordingly revenue, expenses and non-monetary balances are translated at the rate of exchange prevailing at the transaction dates, and monetary balances are translated at the rate prevailing at the balance sheet date with resulting exchange gains and losses being included in the determination of income.

i) Loss per share

The Company uses the treasury stock method in computing loss per share. Under this method, basic earnings per share is computed by dividing earnings available to common shareholders by the weighted average number of common shares outstanding during the year.

For the nine month period ended June 30, 2010 and 2009, the existence of warrants and options affects the calculation of loss per share on a fully diluted basis. As the effect of this dilution is to reduce the reported loss per share, fully diluted loss per share information has not been shown.

j) Income taxes

The Company uses the asset and liability method for recording income taxes. Temporary differences arising from the difference between the tax basis of an asset or liability and its carrying amount on the balance sheet are used to calculate future income tax liabilities or assets using the tax rates anticipated to apply in the periods that temporary differences are expected to reverse.

k) Flow-through shares

The Company has financed a portion of its exploration activities through the issuance of flow-through shares. Under the terms of the flow-through share agreements, the tax attributes of the related exploration expenditures are renounced to subscribers. To recognize the foregone tax benefits to the Company, the carrying value of the shares issued is reduced by the tax effect of the tax benefits renounced to subscribers.

The Company follows the recommendations of the Emerging Issues Committee ("EIC") of the CICA with respect to flow-through shares, as outlined in EIC-146. The application of EIC-146 requires the recognition of the foregone tax benefit on the date the Company renounces the tax credits associated with the exploration expenditures, provided there is reasonable assurance that the expenditures will be made.

For the nine month period ended June 30, 2010 and 2009, the Company did not issue any flow-through shares.

TINTINAGOLD RESOURCES INC.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE NINE MONTHS ENDED JUNE 30, 2010**

(Unaudited - Expressed in Canadian Dollars)

2. SIGNIFICANT ACCOUNTING POLICIES (continued)**l) Financial instruments**

The Company's financial instruments consist of cash, amounts receivable and accounts payable. It is management's opinion that the Company is not exposed to significant interest, currency or credit risks arising from its financial instruments and that their fair values approximate their carrying values, unless otherwise noted.

All financial instruments are classified into one of five categories: held-for-trading, held-to-maturity investments, loans and receivables, available-for-sale financial assets or other financial liabilities. All financial instruments and derivatives are measured on the balance sheet at fair value except for loans and receivables, held-to-maturity investments and other financial liabilities which are measured at amortized cost. Subsequent measurement and changes in fair value will depend on their initial classification. Held-for-trading financial assets are measured at fair value and changes in fair value are recognized in net income. Available-for-sale financial instruments are measured at fair value with changes in fair value recorded in other comprehensive income until the instrument is derecognized or impaired.

The Company has classified its financial instruments as follows:

- i) Cash as held-for-trading and measured at fair value with changes in fair value recognized in net loss
- ii) Amounts receivable as loans and receivables and measured at amortized cost
- iii) Accounts payable are classified as other financial liabilities and measured at amortized cost

m) Use of estimates

The preparation of financial statements in conformity with Canadian generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The more significant areas requiring the use of estimates include impairment of the resource properties, stock-based compensation and future income tax benefits. Management bases its estimates on historical experience and on other assumptions considered to be reasonable under the circumstances. However, actual results may differ from the estimates.

n) Comprehensive Loss

Comprehensive loss is comprised of the sum of the net loss and other comprehensive income or loss which includes unrealized gains or losses from changes in the fair market value of available-for-sale investments, changes in the fair market value of derivative instruments designated as cash flow hedges and currency translation adjustments on self-sustaining foreign operations. The Company does not have any derivative instruments, self-sustaining foreign operations, or any financial instruments classified as available for sale.

TINTINAGOLD RESOURCES INC.**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS****FOR THE NINE MONTHS ENDED JUNE 30, 2010**

(Unaudited - Expressed in Canadian Dollars)

3. CHANGES IN ACCOUNTING POLICY**a) Adopted accounting pronouncements**

General standards of financial statement presentation – CICA Section 1400

Effective October 1, 2008, the Company adopted CICA Handbook Section 1400, "General Standards of Financial Statement Presentation." The CICA accounting standards board amended Section 1400 to include requirements of management to assess and disclose an entity's ability to continue as a going concern. The adoption of this standard had no impact on the Company's financial statements.

b) Recent accounting pronouncements**i) Business combinations**

In January 2009, the CICA issued Section 1582, Business Combinations, which replaces former guidance on business combinations. Section 1582 establishes principles and requirements of the acquisition method for business combination and related disclosures. The Section applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 2011 with earlier adoption permitted. The Company is currently evaluating the impact of this standard on the consolidated financial statements.

ii) Consolidated financial statements

In January 2009, the CICA issued Section 1601, Consolidated Financial Statements, and 1602, Non-controlling interests, which replaces existing guidance. Section 1602 provides guidance on accounting for a non-controlling interest in a subsidiary in consolidated financial statements subsequent to a business combination. These standards are effective on or after the beginning of the first annual reporting period on or after January 2011 with earlier adoption permitted. The Company is currently evaluating the impact of this standard on the consolidated financial statements.

iii) International financial reporting standards

Under the pronouncement issued by the CICA Accounting Standards Board in February 2008, effective for its fiscal year commencing October 1, 2011, the Company will be required to prepare interim and annual financial statements under International Financial Reporting Standards ("IFRS") including restatement of amounts reported for comparative purposes. The conversion to IFRS will impact the Company's accounting policies, information technology and data systems, internal controls over financial reporting and disclosure controls and procedures. The transition will also impact business activities, such as foreign currency activities, certain contractual arrangements, capital requirements and compensation agreements.

The Company completed its IFRS diagnostic plan and is currently preparing its IFRS conversion plan which will outline the steps required to complete the transition to IFRS. As part of its transition process, the Company will continue to invest in training and resources to ensure a timely conversion.

<hr/>	<hr/>	<hr/>
\$3,100	525,000	Total consideration to earn the 100% interest in the property

On March 12, 2009, the Company entered into an agreement to acquire a 100% interest in approximately 5,428 Ha of mineral claims, including the 3,185 Ha previously optioned under the agreement dated December 21, 2007, subject to a 1% NSR royalty, and terminated the initial option agreement dated December 21, 2007.

The consideration payable by the Company for the acquisition of the Gnome Zinc Project consisted of \$3,000 in cash and 15,000 common shares of the Company recorded at a fair value of \$5,850. The Company has the right to purchase the 1% NSR royalty for \$2,000,000 up to the period ending on the 10th anniversary of the closing date. The Company completed the acquisition of the mineral claims on May 4, 2009.

On September 30, 2009 the Company's shareholders approved a plan of arrangement ("Arrangement") in which the Company transferred its interest in the Gnome Zinc Project and \$500,000 in cash to AsiaBaseMetals, Inc. ("AsiaBaseMetals"), a wholly-owned subsidiary incorporated for the purpose of the Arrangement. At the effective date of the Arrangement, the Company will distribute to the shareholders of the Company all of the AsiaBaseMetals shares that it received pursuant to the Arrangement. The British Columbia Supreme Court granted final approval for the Arrangement on September 29, 2009.

On October 8, 2009, the Company distributed to the shareholders all of the AsiaBaseMetals shares pursuant to the Arrangement. After completion of the Arrangement, AsiaBaseMetals sought a listing on the TSX.V. The Company recorded the transaction as a shareholder distribution at the carrying value of the Gnome Zinc Project of \$146,748 and a reduction in cash of \$500,000 with the offsetting reduction in share capital of \$646,748.

Agreements with Affiliates of Rio Tinto and NovaGold

The Company entered into two separate agreements dated August 27, 2008 with affiliates of Rio Tinto PLC ("Rio Tinto") and NovaGold Resources Inc. ("NovaGold") to purchase a 100% interest in mineral claims comprising over 485,000 acres in Alaska. On March 6, 2009, the Company completed and closed the acquisition.

5. RESOURCE PROPERTIES (continued)**Agreements with Affiliates of Rio Tinto and NovaGold (continued)**

The initial closing of the acquisition was subject to a number of conditions including, but not limited to, the completion of satisfactory due diligence, concurrently with the initial closing, a private placement for gross proceeds of a minimum of \$3 million, the approval of the TSX.V and other necessary regulatory and stock exchange approvals.

The agreement with NovaGold entitling the Company to acquire an interest in five mineral properties in Alaska, U.S.A., as outlined below, was amended on November 27, 2008 to change the closing date from November 30, 2008 to December 31, 2008 and to allow for separate closings for the five mineral properties in Alaska. The five Alaska mineral properties comprised of: Colorado Creek, Kugruk, Tintina, Baird, and Omilak.

Pursuant to the amendment dated November 27, 2008, the Company agreed to acquire NovaGold's five Alaskan properties by issuing 3,125,000 common shares at a fair value of \$1,562,500 on the closing date. The Company closed the transaction to acquire the five mineral properties on March 6, 2009.

The Company wrote off \$344,262 in the Tintina property on September 30, 2009 as management rescinded the land claim.

A description of the Alaska properties:

a) Colorado Creek

The Colorado Creek property is comprised of 26,880 acres in 273 Alaska state mining claims. The Company has a lease with Rosander Mining Company, Inc. for 125 40-acre claims, two 20-acre claims, one 15-acre claim, one 27-acre, and one 160-acre claim on the Colorado Creek property. The lease includes a yearly work provision of \$200,000. The remaining 143 160-acre claims are 100% owned by TintinaGold through its wholly-owned subsidiary Tintina Alaska Mining, Inc ("TAMI") (formerly Mantra Alaska Mining, Inc.).

b) Kugruk

The Kugruk property is comprised of 177,280 acres in 1,107 Alaska state mining claims. The Company leases four 160-acre claims from Mr. Joe Wilson and owns the remaining claims through TAMI.

c) Baird

The Baird property is comprised of 80,560 acres in 508 Alaska state mining claims. The Company owns all land claims through its wholly-owned subsidiary Tintina Alaska Exploration, Inc. ("TAEI") (formerly Mantra Alaska Exploration, Inc.) except for the 60 OMAR claims where the Company has a 60% earn-in agreement and yearly minimum work obligation of \$250,000 (for a total of \$2,500,000 from May 31, 2007 to May 31, 2011) with Teck Corporation.

d) Omilak

The Omilak property is comprised of 19,680 acres in 116 Alaska state mining claims. The Company owns 100% of the claims through TAEI.

5. RESOURCE PROPERTIES (continued)**Golden Lynx**

On May 20, 2009, the Company completed the acquisition of a 55% interest in Golden Lynx LLC ("Golden Lynx") through the Company's wholly-owned subsidiary, and issued 4,200,000 common shares at a price of \$0.90 per share as consideration for the interest in Golden Lynx. Golden Lynx is currently the owner of 135 claims located in southwestern Alaska that comprises approximately 20,040 acres.

The Company accounted for the transaction as a purchase of assets and accordingly has recorded the asset at the fair value of shares issued of \$3,780,000 plus the associated future income tax liability of \$2,625,766.

In order to maintain its interest in Golden Lynx, the Company must make capital contributions to Golden Lynx of US\$321,000 by April 18, 2010 and a further US\$1,500,000 by April 18, 2013, which amounts will be used to fund exploration expenditures on the Golden Lynx properties. The Company also must spend US\$1,000,000 to advance exploration of the properties on or by April 18, 2010. The Company will have the right to acquire an additional 25% interest in Golden Lynx by making an additional capital contribution of US\$2,500,000 by April 18, 2015.

The Company wrote off \$6,625,041 of its mineral property interest in Golden Lynx at September 30, 2009 as management rescinded the option to maintain its interest. The Company is not subject to further obligations or commitments as a result of this action.

Sheep Creek

On May 2, 2010, the Company, through its wholly-owned subsidiary, TAEI, entered into mining lease agreements and a surface use agreement (collectively, the "Sheep Creek Agreements") with the owners of the Sheep Creek copper-cobalt property in central Montana, USA.

The Sheep Creek Agreements provide the Company, through its subsidiary, with exclusive use and occupancy of any part of the property that is necessary for exploration and mining activities for an initial term of 30 years, which can be extended by TintinaGold for additional periods of 10 years in certain circumstances. The Sheep Creek Agreements provide for surface lease payments and, prior to commercial production, advance minimum royalty payments to be paid to the lessors, in cash, and a net smelter returns ("NSR") royalty of 5% after commencement of commercial production, if any. The Company has the right to buydown this royalty to 2% at any time after completion of a feasibility study by making payments to the lessors totalling US\$10,000,000.

The following is a schedule of payments due to the lessors during the initial term of 30 years:

5. RESOURCE PROPERTIES (continued)

Sheep Creek (continued)

The Sheep Creek property consists of approximately 4,714 acres of fee-simple lands in central Montana. The property contains sediment-hosted zones of massive sulfide mineralization originally explored by Cominco American Inc. and BHP during the 1980's and early 1990's. The drilling undertaken by Cominco American Inc. and BHP had encountered significant zones of stratabound copper sulfide with cobalt in multiple bedded pyrite zones in the lower part of the Precambrian Belt/Purcell Supergroup; this same stratigraphic unit hosts the Sullivan zinc-lead-silver deposit.

8. STOCK OPTION PLAN AND STOCK BASED COMPENSATION

In 2005, the Company adopted a rolling stock option plan (the "Plan") to grant options to directors, senior officers, employees, independent contractors and consultants of the Company. The Plan reserves for issuance up to 10% of the issued and outstanding share capital of the Company from time to time, and provides that it is solely within the discretion of the Board or, if the Board so elects, by a committee consisting of not less than two of its members appointed by the Board, to determine who should receive options and in what amounts. Options granted under the Plan for a term not to exceed 5 years from the date of their grant and are exercisable at a price not less than the discounted market price (which is the market price less a discount of 25% for a closing price of up to \$0.50, a discount of 20% for a closing price of \$0.51 to \$2.00, and a discount of 15% for a closing price above \$2.00, subject to a minimum of \$0.10).

On September 30, 2009, the shareholders of the Company approved the implementation by the Company of a new stock option plan (the "New Plan") for the Company. The New Plan is a 10% rolling stock option plan and has the same basic terms as the Company's old Plan. The New Plan was updated to include certain additional features to conform to the new TSX.V policies. The Company obtained regulatory approval for the New Plan.

The Company uses the Black-Scholes option valuation model to value stock options. The Black-Scholes model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable.

The model requires management to make estimates which are subjective and may not be representative of actual results. Changes in assumptions can materially affect estimates of fair values.

During the nine months ended June 30, 2010, the Company granted stock options under the Company's Stock Option Plan as follows:

- a) On April 8, 2010, to directors, officers, employees and consultants of the Company an aggregate of 2,170,000 stock options exercisable for a period of five years at a price of \$0.50 per share. The stock options will vest as follows: one-third (1/3) of the total grant upon approval; one-third (1/3) on April 8, 2011; and one-third (1/3) on April 8, 2012.
- b) On May 3, 2010, 200,000 stock options to a director. The option grant, which vests over a period of two years, will be exercisable for a period of five years, at a price of \$0.61 per share.
- c) On May 5, 2010, 50,000 stock options to a consultant. The option grant, which vests over a period of two years, will be exercisable for a period of five years, at a price of \$0.60 per share.
- d) On June 23, 2010, 100,000 stock options to a director. The option grant, which vests over a period of two years, will be exercisable for a period of five years, at a price of \$0.55 per share.

During the year ended September 30, 2009, the Company granted an aggregate of 2,920,000 stock options under the Company's old Plan to employees, officers, directors, and consultants. The options are exercisable for a period of five years, at prices ranging from \$0.50 per share to \$1.00 per share. Of the stock options granted, 1,550,000 fully vested on the grant date, and the remaining 1,370,000 stock options vest at a rate of 1/3 one year after the grant date, and 1/3 each year thereafter until the options are fully vested.

Pursuant to the Arrangement, on October 8, 2009, the number of Company common shares issuable upon exercise and the exercise price per share of each stock option was adjusted.

Stock options outstanding at June 30, 2010 will expire between July 4, 2010 and June 23, 2015.

The fair value of stock options outstanding during the nine months ended June 30, 2010 and granted during the year ended September 30, 2009, have been estimated using the Black-Scholes model and have been recorded as an expense and included in contributed surplus. For purposes of the calculation, the following weighted average assumptions were used under the Black-Scholes option pricing model:

	June 30, 2010	September 30, 2009
Risk free interest rate	2.60%	2.28%
Expected dividend yield	0%	0%
Expected stock price volatility	109%	105%
Expected life of options	4.16 years	4.79 years

The weighted average per share fair value of options June 30, 2010 was \$0.42 (September 30, 2009: \$0.55).

10. INCOME TAXES

The Company and its subsidiary have losses carried forward of approximately \$3,656,000 to reduce income taxes in future years, expiring as follows:

2010	\$	179,000
2014		273,000
2015		200,000
2026		427,000
2027		561,000
2028		810,000
2029		1,206,000

The Company also has certain allowances in respect of resource development and exploration costs, which, subject to certain restrictions, are available to be offset against future taxable income.

The Company has not recognized any future income tax assets. The Company has recorded a valuation allowance against its future income tax assets based on the extent to which it is more likely than not that sufficient taxable income will not be realized during the carryforward periods to utilize all future tax assets.

	Fiscal 2012	<u>131,049</u>
		<u>309,752</u>

- b) The Company has commitments to incur exploration costs as disclosed in Note 5.

14. MANAGEMENT OF CAPITAL

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the sourcing and exploration of its resource properties. The Company does not have any externally imposed capital requirements to which it is subject to.

As at June 30, 2010, the Company had capital resources consisting of cash and amounts receivable. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares or dispose of assets or adjust the amount of cash.

The Company's investment policy is to invest its cash in investment instruments in high credit quality financial institutions with terms to maturity selected with regards to the expected time of expenditures from continuing operations.

The Company expects its current capital resources will be sufficient to carry its exploration plans and operations through its current operating year.

15. FINANCIAL INSTRUMENTS AND FINANCIAL RISK**Fair Value of Financial Instruments**

The Company's financial instruments include cash, amounts receivable, and accounts payable. The carrying value of these instruments approximates their fair values due to the relatively short periods of maturity of these instruments.

Transaction Costs

Transaction costs attributable to the acquisition or issue of financial assets or financial liabilities, other than those classified as held-for-trading, are added to the initial fair value amount to match the costs with the related transactions.

Liquidity Risk

The Company manages liquidity risk by maintaining adequate cash balance. The Company continuously monitors and reviews both actual and forecasted cash flows, and also matches the maturity profile of financial assets and liabilities.

15. FINANCIAL INSTRUMENTS AND FINANCIAL RISK (continued)**Credit Risk**

The Company maintains substantially all of its cash with major financial institutions. Deposits held with these institutions may exceed the amount of insurance provided on such deposits.

Currency Risk

The Company incurs costs and expenses in foreign currencies other than the Canadian dollar. The exchange rates covering such currencies, including the US dollars and Indian rupees, are subject to fluctuation which gives rise to foreign currency exposure, either favourable or unfavourable. The Company does not hedge the US dollars or Indian rupees against its functional currencies.

Sensitivity analysis

The Company has completed a sensitivity analysis to estimate the impact on net income for the period which a change in foreign exchange rate during the year ended June 30, 2010 would have had.

a) US dollar

The result of the sensitivity analysis shows that if the Canadian dollar had weakened/strengthened 10 percent against the US dollar with all other variables held constant after-tax net loss and comprehensive loss for the year would have been \$404,043 lower/higher.

b) Indian rupee

The result of the sensitivity analysis shows that if the Canadian dollar had weakened/strengthened 10 percent against the Indian rupee with all other variables held constant, after-tax net loss and comprehensive loss for the year would have been \$2,092 lower/higher.
